Education

California Baptist University · Riverside, CA — Sep 2022 – Apr 2026
B.S. in Computer Science, GPA: 3.61

Work Experience

IntelliEvent — Riverside, CA
Support Dev Intern — Jun 2025 – Aug 2025

- Redesigned 300+ HTML print templates for 100+ enterprise clients, improving maintainability and readability.
- Wrote tools to optimize company workflow, increase productivity and reduce errors in data.
- Attended daily standup meetings and code reviews, both in-person and online.

California Baptist University — Riverside, CA
Resident Advisor — Aug 2023 – Jun 2025

- Assisted in moving in 400+ students to their dorms over the course of 2 days.
- Planned and implemented monthly social events & gatherings for 40+ Residents.
- Designed & implemented systems like ADP+ that increased workplace productivity by 17%.

IDTech - CalTech Campus — Pasadena, CA
Instructor — Jun 2024 – Aug 2024

- Taught Filmmaking and Programming Principles to HS Students.
- Worked with a team of instructors to plan lessons and effective teaching strategies.
- Fostered a safe and welcoming environment by encouraging collaboration.

Projects

gmesg *Go, Bubble Tea, Cobra, Unix Sockets* — github.com/inVariabl/gmesg
Terminal client for Google Messages, with an interactive TUI and a scriptable CLI — Jul 2026 – Present

- Built terminal QR-code authentication against libgm's reverse-engineered RCS pairing protocol.
- Interactive TUI with vi-mode navigation, inline terminal image previews with ueberzug, attachments, and reactions.
- Refactored the daemon into an IPC server over Unix sockets so clients share sessions without corrupting auth tokens.

ADA Font Check *C / WebAssembly, SvelteKit, TailwindCSS / DaisyUI* — adafontcheck.xyz
Web application that determines if font files meet ADA requirements — Dec 2018 – May 2026

- Designed a custom font glyph parsing algorithm based on Cartesian geometry.
- Rewrote analysis engine in C compiled to WebAssembly; scaled from crashing at ~1,000 fonts to processing batches of 10,000+ with flat memory usage.
- Used monthly in production by Selbert Perkins Design for the past 6 years.

St. Paul's Postal Service *C, raylib, WebAssembly* — invariabl.github.io/spps-raylib
Educational RPG-style videogame that follows St. Paul's final missionary journey — Sep 2025 – Apr 2026

- Worked with 3 other seniors to plan and implement gameplay, storyline, and mechanics.
- Integrated A* Pathfinding algorithm for player and NPC movement.
- Implemented an on-the-fly camera system to switch between first and third-person POV.
